

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Organizations often handle software installation requests through emails or manual communication, leading to delays, poor visibility, lack of tracking, and compliance issues.
2	Idea / Solution description	The Software Installation Request Automation project in ServiceNow streamlines how employees request, approve, and fulfill software installations. A Service Catalog item allows users to request approved software, while Flow Designer automates approvals, task creation, notifications, and request tracking.
3	Novelty / Uniqueness	Provides an end-to-end automated workflow using ServiceNow Service Catalog, Flow Designer, approvals, and task management instead of manual processing.
4	Social Impact / Customer Satisfaction	Improves user experience through faster approvals, transparency, reduced manual effort, and timely software delivery.
5	Business Model (Revenue Model)	Designed for enterprises using ServiceNow ITSM to reduce operational costs, improve compliance, and enhance service delivery.
6	Scalability of the Solution	The solution can be expanded with software license management, asset management, cloud application provisioning, multi-level approvals, and enterprise integrations.
